## FMS Installation

Fuel Monitoring Sensor is installed in the geometrical center of a tank and it is connected to the Vehicle Tracking System/GPS

**Fuel Volume**  
Sensors determine the fuel volume in the tank and generate fuel volume (in liters or in percentage of full tank) in the output message

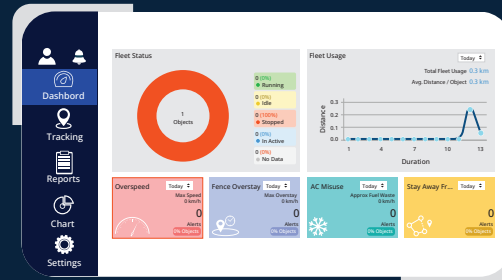

## Sensor and GPS

Fuel level sensor passes the information on raising or lowering fuel level or volume in tank to tracking device

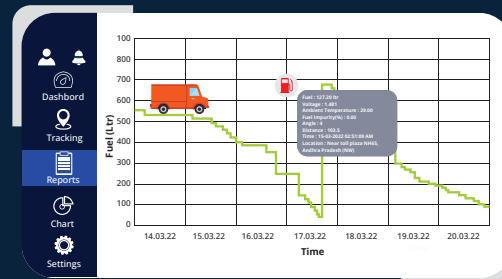

**Location and Time**  
Vehicle tracking system with the help of GPS determines the location and time. The user of a system receives information about changes in fuel level in the form of parameters or Graphs.

**“Get instant, in-depth fleet performance data with detailed reports that suit every business**

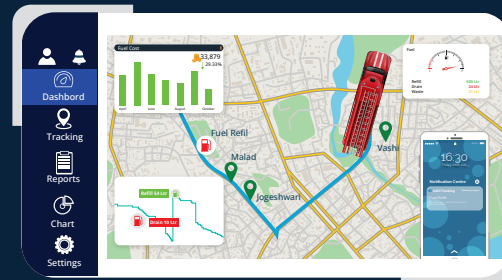

## CONSOLIDATED REPORT ON A SINGLE DASHBOARD

Get access to the status of the vehicle whether it is moving or idle, you can get trip start and end time and also the total trip duration all on one single dashboard.

## FUEL CONSUMPTION REPORT

Fuel theft and unauthorized use are persistent problems in many regions but with our GPS fuel theft tracking system you can not only reduce fuel but can also identify the time and location.

## FUEL MILEAGE AND IDLE WASTAGE ANALYSIS

Check fuel consumption in accordance with the total distance covered and get an in-depth report on idle time, along with the place and location where the wastage happened all on a single dashboard.

**PUMP UP YOUR PROFITS**  
**NOT YOUR FUEL COSTS**
